<b>Summary of Expertise:</b> I have graduated from Isfahan university(2006) Now I studying in kerman university in paleontology & stratigraphy branch.I working on Taleh zang(L-Eocene) Formation in luristan.I study this formation by biostratigraphy base on bentic foraminifera and use this fossils and sedimentological data(microfacies analysis) for sedimentary environment reconstruction. Also I study sequence stratigraphy of this Formation to achieve spatial facies distribution Then add biostratigraphy data for best correlation	
<b>Interests:</b> Sequence stratigraphy biostratigraphy application on basin analysis reservoir characterization sedimentary environment
